

KIKOKUSHIJO ACADEMY

Summer Day Camp 2026

Dates: July 21st – August 14th

Schools: Toritsudaigaku East, Meidaimae, Meguro, Funabashi, Tama Plaza, Funabashi, Mita, Kichijoji, Shibuya, Basamichi

Program A

Grade 1 - 2

English

Join Alp on his quest to find the “perfect” school day. You will learn four key school subjects—Culture, Natural Science, Technology, Environmental Science, and more. You will also solve puzzles, write stories, and get some physical exercise in, too! You definitely don’t want to miss out!

Science

Who was Isaac Newton, and what did he teach us? In this class, you will explore Newton’s Laws of Motion by conducting a variety of mini-experiments, and recreate one of Newton’s very own gadgets.

Grade 3 - 4

English

Join Alp and Pat on their quest to find the “perfect” school day. You will learn four “key” school subjects—Geography, Music, World History, and Environmental Science. You will also watch videos, write stories, and solve puzzles. You definitely don’t want to miss out!

Science

In this class, you will read, write, and talk about an important field of science—Chemistry. And you will learn, through fun experiments, just how awesome chemistry can be.

Art and Crafts

Dive into a wave of creativity with ocean art adventures, where vibrant marine life inspires lasting summer treasures! Campers will build their very own original coral reefs, master the shiny textures of foil embossing, and capture the magic of the sea in a swirling ocean-in-a-bottle. Let’s make a splash and bring home beautiful, ocean-themed pieces!

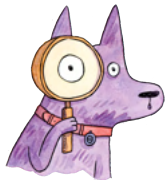

Program B

Grade 1 - 2

English

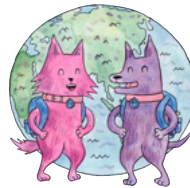

In this camp, you will be traveling to some of the world's most breathtaking natural destinations: Towering mountains, deep canyons, and way up north to the Arctic to see the dazzling Northern Lights. You will also visit Earth's most diverse ecosystem with its own distinct plant and wildlife. All these wonders await you!

Science

Your eyes are like cameras that take in everything in the world around you all at once. In this class, you will learn about the human eye and how our eyes see. You will also learn about optical illusions, optical equipment, and the different ways in which animals—birds, mammals, insects—perceive their surroundings.

Grade 3 - 4

English

Join Alp and Pat on an adventure of a lifetime as they embark on a world tour of some fantastic holiday destinations! In this class, you will visit and learn about an ancient, Indian palace, the wild, African savannah, a vibrant, European city, and world-renown museums.

Science

In this class, you will explore all things space—from neighbouring planets to galaxies millions of light years away. You will also be set on a NASA mission to design and build a "lander" for future Mars exploration. It's going to be out of this world!

Art and Crafts

Unleash your inner artist as we transform vibrant colors and unique shapes into lasting treasures! Campers will piece together stunning mosaic designs, catch the rays with handcrafted suncatchers, and engineer their own dazzling kaleidoscopes. Together, we'll explore hands-on creativity and bring home a gallery of beautiful, sun-kissed masterpieces!
